CAREER OBJECTIVE

Seeking opportunity to build career in growing organization, where I can get opportunities to prove myself, abilities by accepting challenges full filling organization goal and career ladder through the continues learning and commitment.

EDUCATION

B.Tech - CSE

(2024 - Present)

MVGR College of Engineering, Vizianagram

Diploma in CSE

(2020-2023)

Government Polytecnic for Women, Bheemunipatnam, AP

PROJECTS

Hotstar Prototype using Figma

- Independently designed a UI/UX prototype of Hotstar, focusing on seamless navigation and user experience.
- Conducted self-testing and iterated on the design based on feedback to improve usability and aesthetics.

AI Voice Assistant using Python

- Developed a Python-based voice assistant capable of performing tasks such as opening applications, searching the web, fetching news/weather updates, and responding to voice commands.
- Implemented **speech recognition, text-to-speech, and NLP libraries** to enable real-time interaction.
- Integrated APIs to extend functionality for tasks like music playback, Wikipedia search, and system automation.

Real-Time Location Tracking for NSG (Tools Used: Blender, Python, Matplotlib)

- Developed a live tracking system for NSG (National Security Guard) teams operating in complex urban environments such as hotels and metro stations.
- Focused on enhancing tracking accuracy by addressing challenges with traditional GPS/GSM in multi-floor and basement environments.
- Integrated real-time location data with 3D building models for tactical visualization, aiding in better decision-making during critical operations.
- Proposed a solution that eliminates the need for UWB hardware, ensuring cost-effectiveness while maintaining operational reliability.

NYD Hackathon 2025 – Participant

- Developed a Retrieval-Augmented Generation (RAG) pipeline integrating LLMs to fetch relevant shlokas from the Bhagavad Gita and Patanjali Yoga Sutras based on user queries.
- Implemented text chunking, reranking, and prompt engineering to minimize hallucinations and ensure contextual accuracy.
- Designed outputs in structured JSON format for easy integration with applications.
- Collaborated in a team environment to apply AI for cultural and educational enrichment.

Sankalp 2025 – Intra-College Hackathon (Selected Team)

- Selected among competing teams to solve the problem statement: “AI-powered Requirement Gathering using Multi-Agent Systems.”
- Designed and developed a real-time AI-driven application with multilingual voice support, stakeholder-specific inputs, and automated generation of industrial-standard SRS/BRD/User Stories.
- Implemented accessibility features for illiterate/non-technical users through speech-to-text, text-to-speech, and icon-based interfaces.
- Integrated conflict detection, ambiguity resolution, and business alignment agents to ensure clarity, consistency, and goal alignment in requirements.
- Achieved a solution that reduces requirement-gathering time, minimizes errors, and improves collaboration between clients, end users, and developers.

SKILLS

Technical Skills:

- **Programming:** Python, C, C++
- **Web Development:** HTML, CSS, JavaScript
- **UI/UX & Design:** Canva, Figma, UI/UX
- **Tools/Software:** GitHub, MATLAB, Adobe Creative Cloud

Soft Skills:

- Communication, Critical Thinking, Teamwork, Problem Solving

EXPERIENCE

Front office executive , Global Tag Solutions

Jul 2023 - Nov 2023

- Acted as the first point of contact, managing front-desk operations with professionalism and efficiency.
- Handled daily administrative tasks including phone/email communication, visitor coordination, and appointment scheduling.
- Maintained organized documentation and supported cross-functional teams with clerical duties.
- Strengthened time management and interpersonal skills in a fast-paced, dynamic office environment.

- Completed a structured training program focused on UI/UX fundamentals, user-centered design principles, and design thinking.
- Learned to create wireframes, user flows, and interactive prototypes using tools like Figma and Adobe XD.
- Built sample projects as part of training to apply theoretical concepts in practical scenarios.

CERTIFICATIONS

1. UI/UX Design by Tech Mahindra
2. Certificate of Participation by AICTE for Smart India Hackathon 2024
3. Certificate of Participation in NYD hackathon 2025
4. Python Essentials 1 – Cisco Networking Academy

ACTIVITIES

- Finalist at Smart India Hackathon 2024
- Participant of National Youth Day Hackathon 2025
- Volunteered for Swecha AP Freedom Fest 2025
- Active volunteer at From the Youth For the People and MVGR GLUG

PERSONAL INFORMATION

- **DOB** : 28-05-2005
- **Gender** : Female
- **Nationality** : Indian
- **Marital status** : Unmarried
- **Religion** : Hindu
- **Languages Known** : Telugu, English, Hindi
- **Interests** : Designing, event volunteering
